Planet Clare

Aries: This month the focus is on one to one relationships. With several planets transiting through your sectors of partnership and sharing, it's really up to you to make the first move in establishing closer bonds of trust and inter-dependence. In doing so, you will reap the rewards of mutual support.

Taurus: Tidying up routines at work is necessary during the first part of the month. As things progress you focus on the relationships you have been forming that strengthen your position and provide you with opportunities. You will realise that you and those you contact can mutually benefit from your efforts.

Gemini: Okay, so you are a very creative person and you have a heap of ideas to share with others. That is all very well and good but you now need manifest these ideas into some concrete forms so that the world will see what you are really trying to say.

Cancer: Is your house in order yet? After the efforts you have put into securing your foundations, you should be feeling very safe and ready to get down to doing something that expresses your creative talents. Don't be shy. Show yourself and let others see your unique vision of the world.

Leo: If you don't communicate others will never know what you think and feel. By the same token you have to realise that talk is cheap. What you say and do must come from deep within you to be truly authentic, convincing and to have the ring of truth about it.

Virgo: With several planets in your sector of personal resources, you are both willing and able to splash around a bit of cash. You have some schemes and plans to act upon. Put some of your resources into developing these projects. They will bear fruit in the not too distant future.

Libra: So Libra it's your birthday month and you are fabulous! With lots of charm and charisma on your side, you should use this opportunity to pursue some special goal. After weighing up the pros and cons - as you tend to do - why not just choose to be successful?

Scorpio: You have been spending time in a dark and mysterious place where no one else can enter. So what's new? As October progresses you will come out of your shell, poke your head around the corner and realise it's actually a lot more interesting out there in the real world.

Sagittarius: You friends and their needs and interests have been the primary focus in your life for quite a while. You are getting just a little bit sick of this and want to give some attention to your own needs and interests. Why not take time out for your own interests?

Capricorn: You have been tending to your career lately and making sure it is on the right track. This is not a bad thing but you should be more confident now to let your focus shift to broader issues where you can apply all that you have learned and acquired professionally.

Aquarius: You have been thinking about bigger and broader issues than usual and this has informed you, if not exhausted you intellectually. Now it is time to bring the knowledge that you have gained into your practical life and do something constructive that is based on your vision and your beliefs.

Pisces: Trust is such a tricky thing. You have to take a leap of faith and put your confidence in someone else who may or may not prove up to the challenge. You should realise one thing - people can always be trusted to be exactly what they are. Don't be fooled.
